Brokers have reduced their loans ma terially in the past week. The public and the professional traders have sold on balthere has been heavy buying of securities. It must be that big people have loaded up, believing that this is a favorable time while the general public is in doubt regarding the election. The big people really do not care who is President, so far as the stock market is concerned, and that the bank statement proves.

and that the bank statement proves.

The market today was much irregular This was due, of course, very largely to the ejection. But many persons had in mind the U-boat that is supposed to be coming to escort the Deutschland home. It is feared that the Germans may decorate the American coast with a few wreeks in honor of the occasion. Therefore marine stock is heavy, and some traders went short of it, believing that the appearance of it would send the market down.

Pools were busy. The new ones in National Enameling advanced the stock 2 points. It is understood the stock 2 points. It is understood the stock 2 points. It is understood the stock 2 to coal the stock 3 to coal financial circles yesterday from Chicago quoted John J. Mitchell, president of the Illinois Trust and Savings Bank, who has just returned from New York, as saying:

tional Enameling advanced the stock 2 points. It is understood that a dividend will be declared on this stock in the near future. If Hughes is elected it will be a tory substantial dividend. Pool buying of Central Leather was of the best kind. No attempt has been made yet by insiders to unload this stock. Baldwin Locomotive is another issue that was well are 119.632 freight and 1,237 passenger.

Locomotive is another issue that was well bought. So was New York Air Brake and Columbia Gas.

Anaconda has been accumulated in heavy volume ever since it fell back from its surge above par. Anaconda owns a large block of Inspiration Copper, a stock which has not by any means discounted its earnings. It would be no surprise to see Anaconda pass Utah in the market in the near future Copper advanced another fraction, and it is now impossible to get the metal for delivery in the first.

CHICAGO GRAIN MARKET.

Chicago, Nov. 4.—The speculative wheat world encountered an old time enemy in the shape of "rigged" Argentine cables as to the price of whast their today. These cables were said to have been sent to the United States by the "big three" of that country who control the grain market. Following the report of a break of seven cents in the market at Buenos Aires a later report placed the change in price at 6% and instead of the latter showing a decline it showed an advance. There was heavy selling on wheat on the first cable, telling of the loss in price and of subsequent heavy buying on the reported advance. The talent in wheat at Chicago was in board of trade parlance "chopped to small bits" because of these reported heavy fluctuations.

wheat at Chicago was in board of trade parlance "chopped to small bits" because of these reported heary fluctuations.

The wheat market was a most nervous one today and it showed net losses of \$10.5% cents. The usual big sales for export were not forthcoming as it is generally known that conditions surrounding the ahipments of grain abroad are against any big export clearances at the present time. This was shown by the charances from North America last week, which were only about half of those for the corresponding time last year. It is said that it will take a few weeks in which to clean up the congestion surrounding the shipments of grain to the East as well as across the water and that a lull in the export takings is expected untit this relief has been made.

Corn and outs were off in price, the former losing \$6 to \$8 and the latter \$8 to \$8. The sea-board reported 200,000 bushels corn asked to exported 200,000 bushels corn in the Chicago market for some time to come as farmers are willing to discose of at least a part of their surphus as present prices look favorable.

The market for provisions closed firm although there was an easy feeling during the early part of the second control of
